

SPECIFICATIONS AMENDMENTS

REPLACE the paragraph on page 1, lines 16-22, of the original specification with the following amended paragraph:

Hildebrandt et al., U.S. patent application No. 10/077,236 filed on Feb. 15, 2002 A.D., which issued as patent No. 6,786,081 (Sep. 7, 2004), discloses direct and/or opposing flowpath refrigeration. In a particular case, that invention is embodied to include a block having test cells for viscometric testing of oil, which can be beneficially employed in ASTM D 4684 type testing, and supplant the Cannon Mini-Rotary Viscometer (MRV). Compare, Selby et al., U.S. patent No. 5,852,230.
